1 AI-Powered Lead Generation & Connection System

1.1 AI Agent Core Architecture Workflow

OutboundAI interfaces user sourcing intent parameters directly with public indexes using Gemini 3.5-flash context grounding layers to crawl live web components and generate qualified structured prospects.

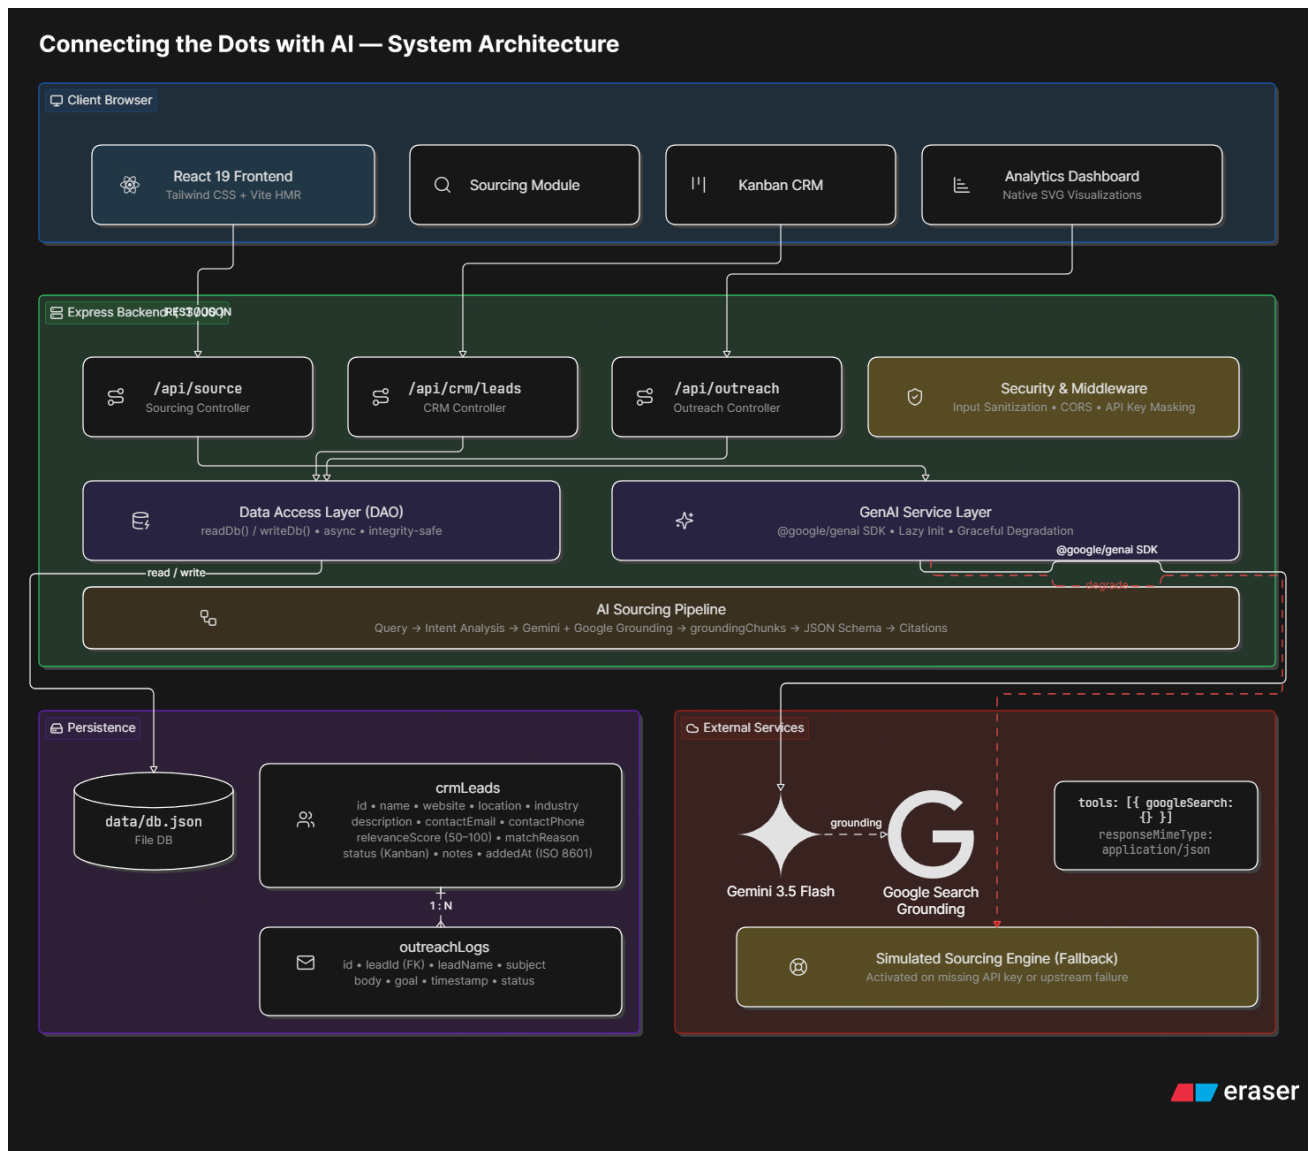

Figure 1: The system design diagram

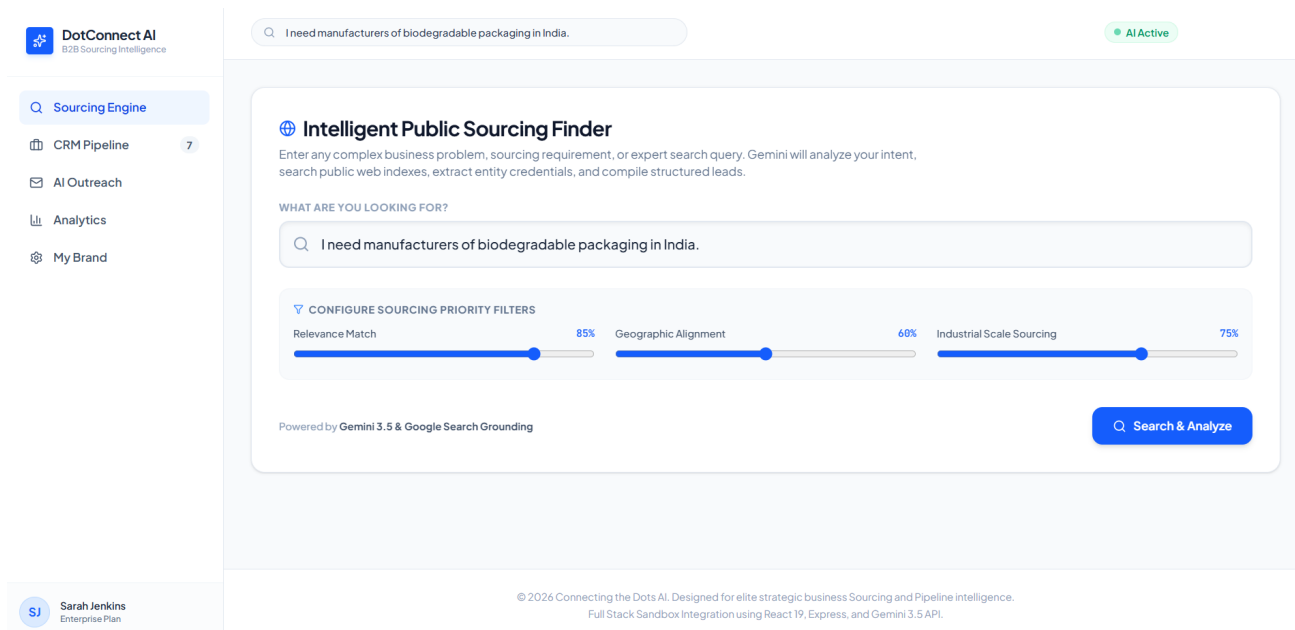

Figure 2: HOME PAGE (SEARCH PAGE)

1.2 Data Integration Loop Back

Extracted lead profiles map directly back to the database core. Bypassing manual entry delays, items sit inside draggable Kanban stages (*Discovered*, *Shortlisted*, *Contacted*) within the React UI. A single click links a buyer's e-commerce demand to a verified local supply contact, closing the search-to-transaction workflow cleanly.

EMAIL SUBJECT LINE

Sourcing inquiry: Grain-based films & edible cutlery for D2C eco-brands

EMAIL MESSAGE BODY

Hi [Recipient Name],

I've been following Bakeys' pioneering work in Hyderabad for some time, particularly your incredible innovation in sorghum-based edible cutlery and custom grain-based films for dry snacks. It is truly a gold standard for circular packaging.

Here at EcoPack Solutions, we consult on and distribute sustainable packaging for a growing portfolio of direct-to-consumer eco-brands. Many of our food and lifestyle clients are actively seeking genuine zero-waste packaging alternatives, and your grain-based wrappers and edible cutlery are a perfect fit for their needs.

We would love to explore adding your products to our distribution network and recommending them to our clients. Could you share your latest product catalog along with wholesale pricing, MOQs, and the

AI SOURCING SELLS STRATEGY ANALYSIS

- ✓ Pioneering Hook: Opened by acknowledging their specific regional presence (Hyderabad) and their unique sorghum-based and grain-based innovations to show genuine research rather than a generic template.
- ✓ Clear Value Bridge: Linked EcoPack's role (consulting and distributing to eco-conscious D2C brands) directly with Bakeys' capabilities, positioning ourselves as a valuable distribution channel rather than a typical cold solicitor.
- ✓ Actionable Request: Concluded with a clear, low-friction request for a catalog and pricing/MOQ, aligning perfectly with the 'Direct Quote' format.
